

IQSE AMO QO Seminar Series

Tuesday, September 20th, 11:30 am ZOOM &
IQSE seminar room (MPHY 578)

Pizza will be served for IQSE members at 11:00 am. The talk will start around 11:30 am

Dr. Galina Shinkareva

Fluxes and partitioning of heavy metals in large river basins: multidisciplinary research

EVENT DETAILS: Historically aquatic systems are considered as cradles of civilizations and drivers of their evolution. However, the centuries-old use of river systems in anthropogenic activities leads to their severe pollution. The understanding of pollutant transport and sedimentation processes in river basins is crucial for the further development of cities and industries. This seminar will focus on a multidisciplinary approach of assessing the processes of self-purification of riverine and deltaic systems from heavy metals pollution using combined methods of land surveys, remote sensing and laboratory analyses.
